

1. Start by logging in or creating an account to play with
  - a. Fill in the username and password fields and press either “login” or “register”
  - b. If you registered and got an error saying the username already exists, choose another username and try to register again. Newly created accounts will start with 1000 coins
  - c. If you are logging in and entered the wrong password, retype your password and press the login button again
2. The game grid will be displayed on the left side of the screen, to turn the tank, use the arrow buttons on the bottom right of the screen. The tank can only turn forwards and backwards.
3. To fire a bullet, press the fire button on the right half of the screen, the bullet will fire in whatever direction your tank is facing. You can also shake the device to fire a bullet.
